ANNUAL UPDATE 2012

Program for the issuance of commercial papers

Issue program ceiling: MAD 1 200 000 000

Par value: MAD 100 000

FINANCIAL ADVISOR

PLACEMENT AGENT

Visa of Conseil Deontologique Des Valeurs Mobilieres (Financial Authority)

In compliance with the provisions of article 18 of Dahir n° 1-95-3 of 24 Chaabane 1415 (26 January 1995) enacting law n° 35-94 pursuant to certain negotiable debt securities as amended and completed, the original of this Information Record was submitted for assessment by the Conseil Deontologique des Valeurs Mobilieres which gave its approval on 15th November 2013 under reference n° VI/EM/030/2013.

Approval by the Conseil Deontologique Des Valeurs Mobilieres (Financial Authority) in no way implies acceptance of the relevance of the operation or authentication of the information provided. It has been approved after investigation of the pertinence and coherency of the said information in conjunction with the operation prospects offered to investors.

Warning

The Conseil Deontologique des Valeurs Mobilières(CDVM) approved on 15th november 2013 an Information Record pursuant to the issuance of commercial papers by Afriquia Gaz.

The said record duly approved by the CDVM is permanently available at the Afriquia Gaz headquarters and from the financial advisor. It is also obtainable within a maximum timeframe of 48 hours at the placement agent. It is also obtainable at the CDVM website www.cdvm.gov.ma

PART I – INTRODUCTION TO OPERATION

I. Objectives

The Company wishes to undertake a commercial paper issuance program in order to:

- Optimize the cost of short term financing by substituting partially or integrally the existing bank debt and overdrafts by treasury bill projects.
- Meet the individual cash requirements induced by working capital variations during the year (due to fluctuations in the payment deadlines of counterparts).

II. Characteristics of transaction

Nature of securities	Marketable securities dematerialized via registration in the Central depository (Maroclear) and entered into an account among authorized affiliates.
Form of securities	Commercial papers written out to bearer.
Issue ceiling	MAD 1 200 000 000
Par value	MAD 100 000
Maturity	From 10 days to 12 months.
Entitlement date	Date of payment.
Interest rate	Determined for each issue according to market conditions.
Interest	Post-calculated.
Coupon payment	<i>In fine</i> . i.e. at due date of each bill.
Repayment of capital	<i>In fine</i> . i.e. at due date of each bill.
Negotiability of securities	No restriction is imposed by the terms of issue with regard to the marketability of the treasury bills issued. The securities are negotiable over the counter. Negotiability is guaranteed by BMCE Bank.
Guarantee	This issue carries no guarantees.
Assimilation clauses	Commercial papers issued are not subject to any assimilation with other securities or previous issues.

III. Placement syndicate – financial intermediaries

Advisor and coordinator	BMCE Capital Conseil 63 bd Moulay Youssef – Casablanca
Placement Agent	BMCE Bank 140. Avenue Hassan II – 20000 Casablanca
Securities account manager	BMCE Bank 140. Avenue Hassan II – 20000 Casablanca
Custodian	BMCE Bank 140. Avenue Hassan II – 20000 Casablanca

PART II – ISSUER INFORMATION

I. General Information

Corporate Name	AFRIQUIA GAZ S.A.
Legal Headquarters	Rue Ibnou El Ouennane. Ain Sebaa – Casablanca
Administrative headquarters	139. Bd Moulay Ismail. Casablanca
Phone / Fax	(212) 05 22 63 96 00 (212) 05 22 24 80 85
Website	www.afriquiagaz.com
Legal form	Business corporation with board of directors
Date of creation	1992
Life span	The corporate life span is set at 99 years except in the event of early wind up or extension stipulated by the company by—laws or the law.

AKWA Group (represented by Mr. Youssef IRAQI HOUSSEINI)	Administrator	Shareholder	1999	OGM deciding on accounts for FY 2016

Source: AFRIQUIA GAZ

III.2. Management Bodies

According to article 22 of the AFRIQUIA GAZ by-laws general management is exercised either by the Board of Directors Chairman or by another individual person appointed by the Board of Directors granted the title of Chief Executive Officer.

Upon a proposal by the chief executive officer, the Board of Directors can nominate one or more individual persons to assist the chairman as general manager bearing the title of Deputy General Manager.

With regard to the Company, the deputy general managers are invested with powers as determined by the Board of Directors upon proposal by the chief executive officer concerning the scope and duration.

With regard to third parties the deputy general managers have the same powers as the chief executive officer.

The below table includes a list of the principal managers of AFRIQUIA GAZ:

Managers	Current Position	Date of taking office
Mr. Ali WAKRIM	Chief Executive Officer of AFRIQUIA GAZ	2008
Mr. Rachid IDRISSE KAITOUNI	General Manager – Gas division (AKWA Group)	2001
Mr. Tawfik HAMOUMI	Deputy General Manager of Afriquia Gaz Manager, Business Unit Distribution	2010 2006
Mr. Khalid TAIF	Manager, Distribution	2012
Mr. Amine ABDELHAKIM	Manager, Business Unit Supply Chain (Afriquia Gaz)	2010
Mr. Ghassane BENCHEKROUN	Chief Financial Officer– Gas division (AKWA Group)	2006
Mr. Redouane BENBIHI	Human Resources Manager– Gas division (AKWA Group)	2005
Mr. Abdelmoula EL MOUAQUIT	Safety and Quality Manager– Gas Division (Afriquia Gaz)	2007

IV. Afriquia Gaz Activity-

IV.1. AFRIQUIA GAZ business activities

The AKWA Group gas division deals with all the links in the LPG value chain directly and via its subsidiaries and other entities: supply, storage, making of cylinders and accessories, filling and distribution of packaged and bulk LPG.

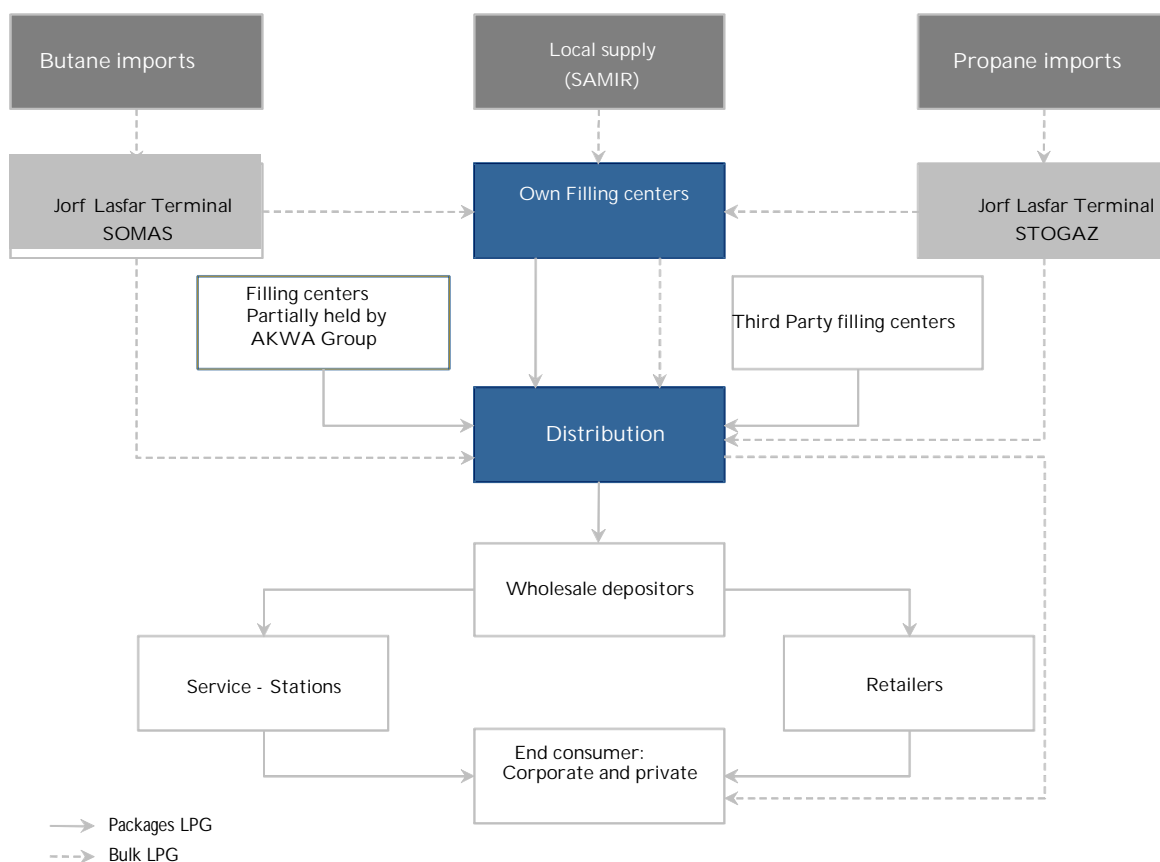

Figure 1. Presence of AKWA Group and AFRIQUIA GAZ in the LPG value chain

Source: AFRIQUIA GAZ

The LPG distribution diagram is the following:

Figure 2. LPG distribution diagram

Source: AFRIQUIA GAZ

IV.1.1. « Filling » activity

The filling activity is strongly correlated to the distribution of packaged LPG. In the framework of LPG distribution, AFRIQUIA GAZ makes use of three types of filling centers:

- Filling centers owned by AFRIQUIA GAZ (in Marrakech, Mohammedia, Jorf Lasfar and Beni Mellal),
- The filling centers held as stakes taken out or entering into the perimeter of AKWA Group (MAGHREB GAZ, AB GAZ, TADLA GAZ, SALAM GAZ and GAZAFRIC).
- Filling centers of other companies.

The choice of one of these three types of filling hinges primarily on the geographical locations of the centers, proximity to the place of distribution and optimization of the supply chain.

The filling centers held by the Company act on behalf of AFRIQUIA GAZ and also for other packaged LPG distributors.

IV.1.2. « Distribution » Activity

AFRIQUIA GAZ has a complete panel of products and offers LPG in bulk or packaged format (Butane B3, Butane B6, Butane B12 and Propane P34). AFRIQUIA GAZ products are listed in the below table:

Table 4 *Afriquia Gaz Products*

	B3	B6	B12	P34	Bulk

PART IV RISK FACTORS

I. Competition risks

The LPG distribution market is highly competitive. However, to be pointed out is that the arrival of new players on the national packaged gas market is unlikely given the extent of the outlays required at the outset. Therefore, the high cost of facilities and the existing distribution network covering almost all of Morocco constitute high barriers to entry.

On the bulk market AFRIQUIA GAZ is tied to formal contracts.

II. Risks linked to market trends

Recent market trends clearly indicate an upward swing in national packaged LPG consumption. What is remarkable in this market segment is the decline in sales of butane B3 attributable to rising sales of butane B6 and B12. The main reason behind this phenomenon is the continuation of the rural electrification program.

Given the level reached by the Global Rural Electrification Program « PERG » (more than 90%), over forthcoming years B3 sales are expected to stabilize.

With regard to the distribution of LPG in bulk form, the market trend is closely tied to fluctuating industrial demand. However, the sales structure of AFRIQUIA GAZ accounts for bulk distribution at less than 10% of turnover vs. more than 90% for the packaged version.

III. Risks linked to liberalization

The liberalization of short term LPG prices for distributors will entail price deregulation and margin fluctuations. Since 1995 only propane has been affected by this measure. This makes it possible for LPG distributors, including AFRIQUIA GAZ, to benefit from a successful experiment, as well as smooth transition from a regulated to a liberalized market.

Afriqueia Gaz enjoys a well-structured organization. Resultantly it is efficiently prepared to confront potential market liberalization and to be in a position to benefit the most therefrom.

IV. Risk of dependency on individual customers

In the portfolio of AFRIQUIA GAZ, no particular customer represents more than 10% of global turnover. Elsewhere, with regard to bulk LPG distribution, in particular to institutional customers, AFRIQUIA GAZ has signed exclusivity contracts.

V. Risks linked to safety

All facilities and items of equipment (filling centers, cylinders, tanks and transport) of AFRIQUIA GAZ answer to the safety standards currently in force in Morocco.

In addition, in the framework of the hygiene program particular to the AKWA Group and the subsidiaries thereof, AFRIQUIA GAZ permanently operates keeping close watch over the improvement of production processes.

VI. Risks linked to international price fluctuations

LPG prices on the international market are subject to substantial fluctuations in connection with crude oil and natural gas prices.

With liberalized propane gas prices AFRIQUIA GAZ, like the other LPG players, for imports, is exposed to international LPG price fluctuations. This is generally passed on to customers but only rarely has an effect on corporate income in connection with the impact of such variations in turnover for propane.

To the extent in which the propane activity of AFRIQUIA GAZ represents less than 10% of turnover, this risk remains very limited in scope.

With regard to butane, fluctuations in international prices currently entail no risk to the extent in which recovery prices are regulated and subsidized via the Compensation Fund.
